OFFICE OF LEGISLATIVE COUNSEL

Friday - 28 December 1962

25X1 1. [] Dropped by the Capitol office of Senate
Majority Leader Mansfield today and talked with his assistant, Mr.
25X1 Francis Valeo, concerning their recent trip. I gave Valeo a number

[]
I then asked Valeo if he and the Senator were satisfied with the information given them with regard to "the airline." Valeo said they were satisfied with the information given them on certain aspects but felt they had not been briefed sufficiently on the operations in Vietnam. Valeo also indicated their interest in the organization of the airline and said they desired information on the total number of contracts which the airline had with the Government and a list of the "important people in the company." I told Valeo that I would look into this for him and would be in touch with him. He said there was no rush since the Senator was presently out of town and would soon be occupied with the reorganization of the Senate. We do have a commitment however to follow up on this matter.

25X1 2. [] Talked with [] on the staff of the
Select Committee on Small Business, regarding his request for access
to two classified Agency reports as they might pertain to the purchase
of boron chemicals. (See Journal of 13 December) I told [] that
25X1 [] he could probably understand that I
could not make these documents available to him, but that I would be
glad to discuss the substance of these reports as they pertained to his
interest. I discussed these reports very generally with [] and, as
25X1 we expected, they did not bear directly on his area of interest. However,
[] did ask if we could be of assistance to the Committee in providing
leads to sources of information as discussed in his original conversation
with us. He said he understood we might not be able to assist, but would
appreciate anything we could give the Committee.
